

Remarks

In the April 19th Office Action, the Examiner rejected claims 1-3, 5-16, and 18-20 under 35 U.S.C. § 103. Claims 4 and 17, however, were deemed to be allowable if rewritten in independent form. The Applicants respectfully disagree with the rejections, and with the Examiner's characterization of the BACKGROUND section of the present application. In order to expedite allowance of the application, however, the Applicants have amended independent claims 1 and 8 to incorporate the limitations of allowable claims 4 and 17 and have canceled claims 4 and 17. Thus, claims 1-3, 5-16, and 18-20 are now allowable.

Furthermore, the Applicants have added new claims 21-23. These new claims are directed to a power supply having a stable reset function in a mobile electronic unit comprising a digital signal processing unit for processing a video signal or an audio signal input into the mobile electronic unit. The power supply includes a means for simultaneously resetting the digital signal processing unit and the controller during a transition period between removing the adapter from the mobile electronic unit and applying power from the battery to the mobile electronic unit. The Applicants are unable to find any teaching or suggestion of a power supply with the claimed functionality in any of the references cited by the Examiner. Thus, the cited references do not anticipate claims 21-23, either singly or in any combination. Claims 21-23 are therefore believed to be allowable.

Accordingly, the application is considered in good and proper form for allowance, and the Examiner is respectfully requested to pass this application to issue. If, in the opinion of the Examiner, a telephone conference would expedite the prosecution of the subject application, the Examiner is invited to call the undersigned attorney.

Respectfully submitted,

Richard A. Wulff, Reg. No. 42,238
